DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 8-11,12, 16-19 and 28-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Fontaine (6880302). Fontaine discloses an apparatus for securing a boarder ceiling panel 1 in a suspended ceiling system having a plurality of suspension elements 3/4, the apparatus comprises:

- A metal boarder structure 2, for attachment of the panel 1 to the suspension element 3
- A plurality of horizontal and vertical members; see annotations on patent copy
- A horizontal member 14/15 is inserted into a hanger section 4 secured to a suspension element 3
- Another horizontal surface 17 supports a panel 1
- The boarder panel 1 has a cut end a cut end, near “A” supported by the boarder structure 2
- An uncut end supported by a grid element 108 which is attached to a suspension element 3 by the frame/boarder 2
- A spring clip 18 keeping the cut end of the boarder panel 1 from displacement from the boarder structure 2

Art Unit: 3635

One of ordinary skill in the art would have appreciated various methods of forming the boarder structure such as from a sheet or by an extrusion method and would have selected any form/method providing the intended structure, purpose and function.

For claims 11-12, 16-19 and 28-29

Fontaine discloses a suspension system for securing ceiling panels at a ceiling trim location, the system comprises:

- A horizontal suspension element 3
- A plurality of hangers 4 attached to the suspension elements
- A boarder structure 2 supporting a first end of a ceiling panel
- The boarder structure being supported by the suspension element 3
- An grid element 108 supporting a second end of a ceiling panel;
- the grid element 108 is supported by the suspension element 3 by the boarder structure 2
- the hangers 4 attach the boarder 2 and the grid 108 to the suspension element 3
- A plurality of horizontal and vertical members; see annotations on patent copy
- A horizontal member 29/14/15 is inserted into a hanger section 4 secured to a suspension element 3
- The boarder is supported by the suspension element 3
- The boarder panel 1 has a cut end a cut end, near "A" supported by the boarder structure 2

- An uncut end supported by a grid element 108 which is attached to a suspension element 3 by the frame/boarder 2
- A spring clip 18 keeping the cut end of the boarder panel 1 from displacement from the boarder structure 2

The boarder structure may be located in any location where it is needed or most appropriately placed such as against or spaced from a wall. Applicant is not claiming a method of use but an article.

Claims 2, 5-7, ~~14~~³-15 are objected to as being dependent upon a rejected claim but would be considered allowable if amended to include the base claim and any independent claim.

Claims 20-21, 23-24 are allowable over the prior art of record.
